EDUCATION

- Peking University** Beijing, China
• *Master of Engineering - Software Engineering; GPA: 3.74 / 4.0* Sep. 2020 - Jul. 2023
Research Area: Natural Language Understanding
- Peking University** Beijing, China
• *Bachelor of Science - Computer Science and Technology; GPA: 3.42 / 4.0* Sep. 2016 - Jul. 2020
Research Area: User Password Understanding and Generation Based on Deep Learning

EXPERIENCE

- Meituan Inc.** Beijing, China
• *Research Intern* Mar. 2022 - Present
 - Event Detection:** Research on event detection at sentence-level and dialogue-level; Research on enriching context of event descriptions through retrieval-based and generation-based methods.
 - Emotion Recognition in Conversation:** Research on emotion recognition in conversations with contextual information, speaker information and generated conversational knowledge.
 - Food Safety Project:** Involved in the optimization of food safety event detection models.
- Beijing Beida Software Engineering Corp., Ltd.** Beijing, China
• *Algorithm Developer Intern* Jul. 2021 - Mar. 2022
 - Provincial Petition Intelligent Platform Project:** User petitions pre-processing; Questions recommendation for petition staff; Entity relation extraction on textual information of user petitions.
 - Natural Language Processing Platform Project:** Responsible for constructing and developing entity relation extraction models and sentiment analysis models.
 - Construction of Chinese Petition Information Extraction Dataset:** Responsible for data pre-processing, annotation documentation, annotation platform development and baselines construction.
- Nanning Money World Microfinance Corp., Ltd.** Nanning, China
• *Backend Developer Intern* May 2020 - Sep. 2020
 - Medical Cosmetology Project APP Development:** Involved in the launch and maintenance of medical cosmetology project application; Responsible for the development of the Risk Control Centre module.

PUBLICATIONS

Accepted:

- **Eliciting Knowledge from Pretrained Language Models for Prototypical Prompt Verbalizer (ICANN 2022, Oral Presentation, First Author):** Utilizing prototypical networks and contrastive learning to form a prototypical prompt verbalizer, and proposing a pre-training procedure for zero-shot scenarios.
- **DESED: Dialogue-Based Explanation for Sentence-Level Event Detection (COLING 2022, Oral Presentation, First Author):** Enriching contexts of event descriptions with dialogue-based explanations.

Under Review:

- **Retrieve and Generate: Enriching Context with Explicit and Implicit Knowledge for Event Detection (Under Review in EMNLP 2022, First Author):** Taking advantage of retrieval-based method and generation-based method to enhance knowledge of event descriptions for event detection.
- **Exploiting Pseudo Future Contexts for Emotion Recognition in Conversations (Under Review in WSDM 2023, First Author):** Improving Emotion Recognition in Conversations with historical contexts, historical speaker-specific contexts, and pseudo future contexts.

PATENTS

- **A Method and Apparatus for Identifying Petitions in Letter Form:** Recognition and pre-processing of different formats of petitions using computer vision and natural language processing methods, and performing a custom user-defined review of their normalization
- **A Method and Apparatus for Evaluating the Manually Extracted Results on Elements of Petitions:** Matching of manually extracted elements with machine-extracted elements using text matching techniques for a petition in order to evaluate the manually extracted results in a uniform manner.

SKILLS SUMMARY

- **Languages:** Python, C/C++, JAVA, SQL, Shell Scripting
- **Libraries&Toolkits:** PyTorch, TensorFlow, L^AT_EX, Git, Linux
